SUMMARY

IT student finishing a B.S. in Information Technology at the University of West Florida, with two years in managed services and a home lab I built and run myself. Coursework and lab work across Windows Server, Active Directory, Azure and AWS, plus networking, systems administration and SQL. Currently studying for CompTIA Network+.

SKILLS

Systems / cloud	Windows Server, Active Directory (AD DS), Azure, AWS, Linux (Debian, Raspberry Pi OS)
Networking	DNS, DHCP, TCP/IP, subnetting, VPN, Pi-hole, Unbound, Tailscale, managed switches
Scripting / data	Python, SQL, Bash, TypeScript
Tools	Git, Microsoft 365, Adobe Creative Suite, Blender, FreeCAD
Other	Client communication, workflow documentation, hardware troubleshooting and repair

EXPERIENCE

Managed Services Associate · Threshold 360, Tampa, FL — Jun 2024 – Present

- Build interactive maps, hotspots and other digital elements for clients inside the company's 3D virtual tour platform
- Work directly with clients to turn requests into delivered assets, including proposing alternatives when a request is not feasible on the platform
- Maintain and update existing client tours and the documentation behind them

Valet / Porter · Bert Smith BMW, St. Petersburg, FL — Dec 2022 – Aug 2023

- Received customer vehicles for service and managed flow through the service lane
- Drove customers to and from their homes and handled vehicle deliveries

Basic Mechanic · Bob Lee's Tire Company, St. Petersburg, FL — May 2022 – Aug 2022

- Full-time summer mechanic performing oil changes, tire rotations, basic repairs and routine maintenance

Food Service · Metro Diner and NitAllys, St. Petersburg, FL — Jul 2019 – May 2021

- Host, busser and food runner; promoted from busser to host and food runner at Metro Diner

EDUCATION & CERTIFICATIONS

B.S. Information Technology · University of West Florida, Pensacola, FL — Expected Dec 2026

Coursework and lab work in networking, systems administration, Windows Server and Active Directory, cloud platforms, and SQL.

CompTIA Network+ · in progress

PROJECTS

Beacon beacon-lfg.com

A live looking-for-group platform for co-op games, built solo on Next.js, TypeScript and Supabase. Discord and Steam sign-in verified server side, access rules enforced in Postgres row-level security.

Homelab

Pi-hole and Unbound running recursive DNS for an apartment network with Tailscale for remote access, housed in a 6U rack I designed in Blender and 3D printed.
